For Better Turf

LAWN SEED PLANTING INSTRUCTIONS

(Provided you use permanent sorts which are high priced without timothy). If much timothy is mixed in cheaper lawn grass, replanting should be done every year.
GRADE SOIL — PERFORATE OR SPADE SOIL 5 to 8 INCHES — FERTILIZE
SOIL — RAKE SOIL SMOOTH — BROADCAST (sow) GRASS SEED THICKLY —
RAKE SEED IN — ROLL OR POUND — WATER LIGHTLY — RAIN EFFECT
SPRINKLER — SEEDING TIME: APRIL TO NOVEMBER.

Full seeding is preferable — gives the lawn a weedless start for the spring.

Don't cut young grass too close.

Roll every week.

Keep soil continually aerated — with sand — TOP DRESSING and frequent hard iron

raking or spiking.

THE EARTH MUST BREATHE — otherwise you will have a cement patch instead of a soft carpet.

Top dress every two months with top soil, humus or peat moss a little sand and fertilizer, and a few handfuls of lawn seed. About a pailful of each all mixed together to be sprinkled and raked evenly all over the lawn.

After you have a lawn — soak it — don't sprinkle it lightly. SUNSHINE may burn a lawn — watering in the shade will show results. Water thoroughly every few days — not a few minutes every evening. Remember, wholesale dealers pay as high as \$1.00 a pound for certain Bent and imported Grasses for turf purposes, therefore the higher the price, the better your lawn.
